Eugeniusz Watutin.

Arcymistrz międzynarodowy.
Trener naszej Kadry Narodowej.
Trener Mistrzyni Świata Natalii
Sadowskiej.

Przygotował tę książkę z nadzieją,
że pomoże ona młodym
warcabistom zbudować solidne
podstawy do dalszej kariery już na
stupolowej desce.

Jacek Pawlicki. Wydawca literatury
warcabowej (ponad 60 pozycji). Opracował
i złożył w końcową postać również i tę książkę.

Aleksiej Czyżow. Dziesięciokrotny
Mistrz Świata. Autor książki
„Wprowadzenie do warcabów
stupolowych” której pomysł i układ
merytoryczny (za jego zgodą) zostały
wykorzystane w tej pozycji.

Materiałów z książki można używać do woli. Na zdrowie!

Wprowadzenie

Dla kogo przeznaczona jest ta książka?

Ta książka to zbiór zadań dla instruktorów i początkujących warcabistów. To nie jest podręcznik a raczej zbiór ćwiczeń. Ma ona pomóc w opanowaniu zasad bicia, podstawowych technik, taktyki i końcówek oraz umiejętności obliczania na 4 posunięcia do przodu. Zadania podzielone są na tematy i usystematyzowane – w razie potrzeby trener może łatwo uzupełnić dany temat. Trudniejsze zadania są oznaczone gwiazdką „*” – im więcej gwiazdek, tym zadanie trudniejsze.

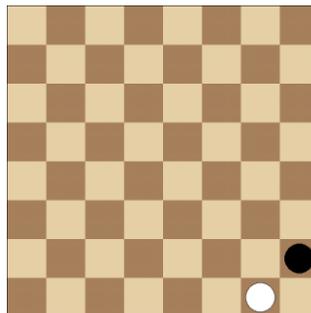

Jak rozwiązywać zadania?

We wszystkich zadaniach białe zaczynają i osiągają „finalną pozycję” po określonej liczbie posunięć – 3 lub 4. W „finalnej pozycji” wygrana białych jest już oczywista i czarne mogą się poddać, gdyż nieuchronnie pozostało im jedynie oddawać swoje pionki. Większość finalnych pozycji kończy się czystą wygraną, gdy czarne nie mogą już wykonać posunięcia. W niektórych pozycjach wygrana może nie być już tak oczywista i wymaga wyjaśnienia.

Możliwe „finalne pozycje”

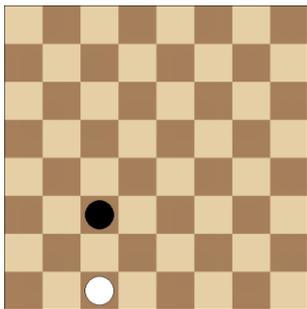

1. Czysta wygrana.

Najczęściej spotykana „finalna pozycja”, gdy przeciwnik nie ma posunięć, gdyż wszystkie jego pionki są zbite lub zablokowane.

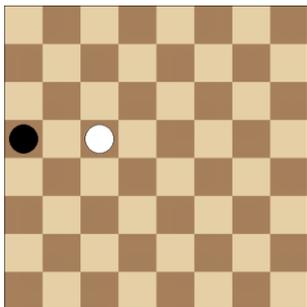

2. Wygrana poprzez „opozycję”

Często „finalną pozycją” będzie różnego rodzaju „opozycja”: „bliska”, „horyzontalna”, „daleka”, „2x1” lub „wielokrotna”. Przy „opozycji” strona, na którą przypada posunięcie przegrywa. Jeszcze raz zwróćcie uwagę na to, że we wszystkich finalnych pozycjach czarne są „na posunięciu”! W książce są również rozdziały poświęcone wyłącznie „opozycji” – przestudujcie je uważnie!

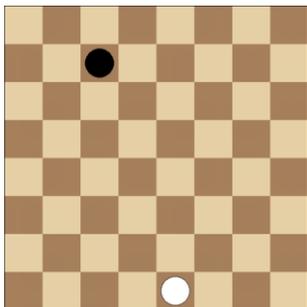

„Bliska opozycja”

Czarny pion znajduje się bezpośrednio w pionie nad białym.

„Opozycja horyzontalna”

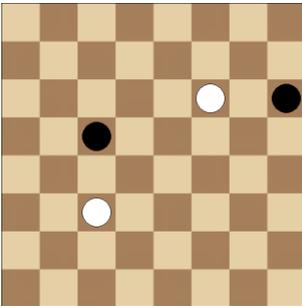

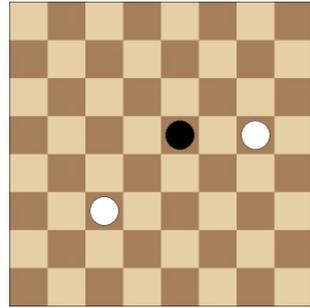

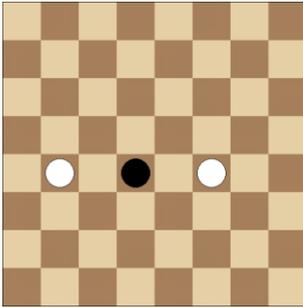

Czarny pionek znajduje się na bandzie o jedną kolumnę od białego.

„Daleka opozycja”

Czarny pionek znajduje się o kilka rzędów od białego. Przy czym ilość kolumn dzielająca te piony winna być nieparzysta. Przy stopniowym zbliżaniu się pionów do siebie powstanie „bliska” lub „horyzontalna opozycja”.

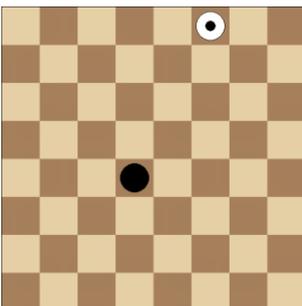

«Opozycja 2x1»

„Opozycja wielokrotna”

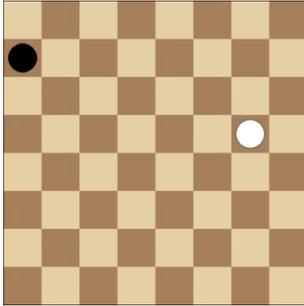

To najbardziej złożony typ „opozycji”, kiedy uczestniczy w niej po kilka pionków z każdej strony. Na wielokrotną opozycję mogą się składać wszystkie pozostałe typy „opozycji”.

3. Wygrana w końcówce

„Szybka damka”

Biała damka zdąży zatrzymać czarnego piona zajmując przed nim opozycję w pierwszym rzędzie. To najważniejszy z przykładów walki damką z pionkiem, na nim opiera się wiele innych finalnych pozycji w końcówkach.

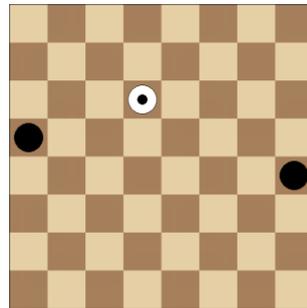

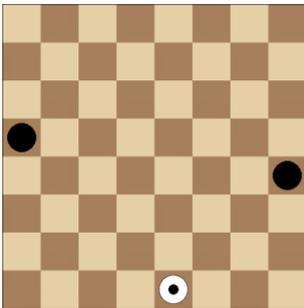

„Zasada 6-go rzędu”

Biały pionek jako pierwszy osiąga szósty rząd. Po przemianie w damkę zatrzyma czarnego pionka („szybka damka”).

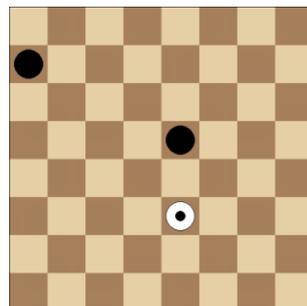

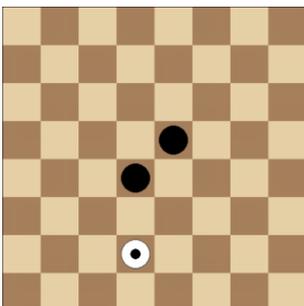

„Widelki”

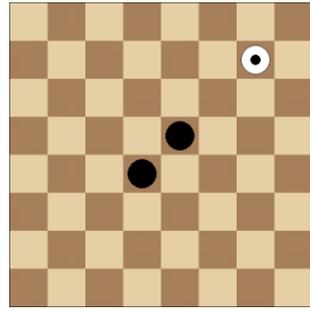

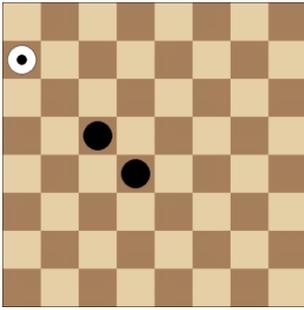

Czarne są zmuszone do poświęcenia jednego pionka, po czym biała damka zatrzyma i zlikwiduje również drugiego („szybka damka”).

„Łańcuszek”

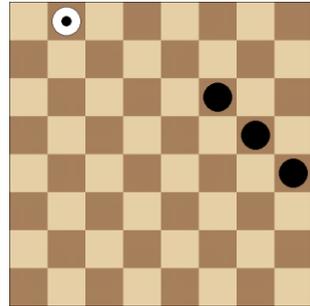

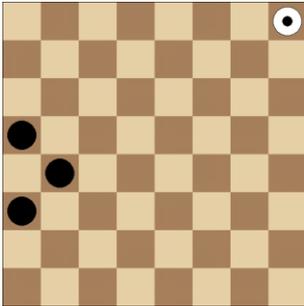

Czarne są zmuszone do poświęcenia jednego pionka, po czym biała damka zatrzyma i zlikwiduje również drugiego („szybka damka”).

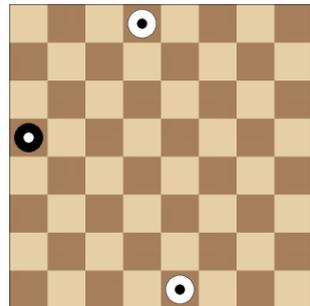

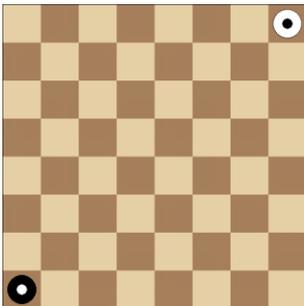

„Odcięcie”

Czarne są zmuszone do oddania swoich pionków, po czym biała dama zatrzyma i zlikwiduje również drugiego („szybka dama”).

„Słupek”

Czarną damkę powstrzymuje jedna lub dwie białe damki i nieuchronnie ginie. Czasem zamiast drugiej białej damki może występować pionek.

4. Wygrana poprzez materialną przewagę.

W niektórych pozycjach białe w wyniku kombinacji zdobywają pionka przewagi lub damkę czy też powstaje pozycja 4 damki przeciw jednej.

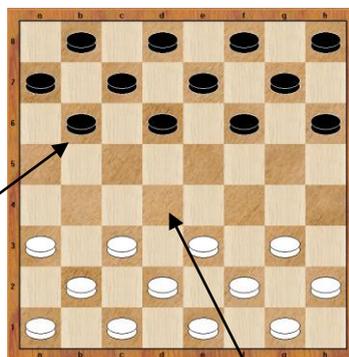

Jak sprawdzić rozwiązanie?

Rozwiązania znajdują się na końcu książki. W warcabach klasycznych, każde pole ma swoje współrzędne: oznaczoną literą kolumnę oraz numer rzędu liczony od strony białych.

Przy zapisywaniu posunięć podaje się numer pola początkowego i końcowego rozdzielając je myślnikiem lub znakiem „x” (oznacza bicie). Przy biciu wielokrotnym nie zapisuje się pól pośrednich. Po posunięciu białych, pod tym samym numerem, zapisuje się posunięcie czarnych.

Na przykład:

b6

d4

„1.c3-d4” oznacza, że wykonano posunięcie z pola c3 na d4

„1.c3xa6” oznacza, że wykonano bicie z pola c3 na a6.

Dla zwięzłości zapisu rozwiązania zapisywane są w skróconej formie. Na przykład:

„b2~” oznacza, że pion lub damka b2 może ruszyć się na dowolne pole.

„f4x” oznacza, że pion lub damka f4 może wykonać bicie, przy czym pole końcowe może być różne.

„xd2” oznacza, że pion lub damka bije na pole d2, przy czym pole początkowe może być różne.

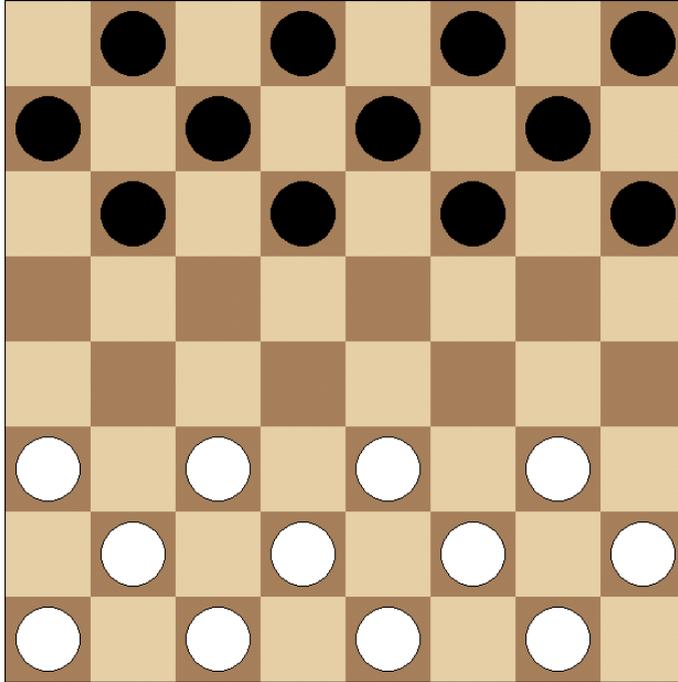

„c1-f4/h6” oznacza, że damka c1 może pójść na pole f4 i kolejne pole na tej linii aż do pola h6.

„e7-d6*” oznacza, że posunięcie e7-d6 jest jedyne bądź wymuszone.

„e7-d6A” oznacza, że oprócz e7-d6 było możliwe inne posunięcie. Możliwa kontynuacja w takim przypadku zamieszczona jest w następnym wierszu po głównym wariantcie, pod literą „A”. W jednym rozwiązaniu może pojawić się więcej wariantów, wówczas każdy jest oznaczany oddzielną literą.

„1...e7-d6” oznacza, że pierwsze posunięcie wariantu wykonują czarne.
